WHAT THE PROGRAMME IS ABOUT

Social Security Policy Support (SSPS) Programme

The Social Security Policy Support (SSPS) Program is a flagship initiative under the Cabinet Division (CD) and General Economics Division (GED) aimed at strengthening social protection systems in Bangladesh. It serves as a catalyst for implementing the National Social Security Strategy (NSSS) and its guided reforms, focusing on reducing poverty and inequality. Through targeted research, policy diagnostics, and systems development, SSPS enhances governance, improves resilience to shocks and stresses, and supports the formulation of effective social security policies. The program is committed to building a robust strategy that ensures sustainable social protection for all.

OBJECTIVES

Ensuring Inclusive Life Cycle
Based On Social Protection And 02
Fiscal Space.

Ensuring Better Governance Of
Social Protection Through
Improved MNE, Single Registry
MIS, Enhanced Accountability.

Develop Universal Pension, Social
Insurance System, Ensuring Inclusive,
Life-Cycle-Based Social Protection
For Old Age And Disability

On Road Map to Single Registry MIS for Social **Protection**

TX

Focal Point

Discussing the efficiency and effectiveness of SSNPs and NHD as a base for MIS

Discussing the Global Best Practices of establishing Single Registry MIS

THE AWARD

SINGLE REGISTRY MIS

EXPECTED RESULT

11 The NSSS 2026+ development began with a concept note (2022-2023), followed by drafting (2024-2025), revisiting the Gender Strategy (2024), and a national dialogue (2025) to finalize it.

06 The programme will develops universal social protection models for urban needs, shocks, and PwD inclusion, with frameworks (2023), pilots (2024), and integration into national policies by 2025.

19 The NSIS addresses unemployment, gender, and disability inclusively, with studies (2020–2022), initiatives (2023), national dialogues (2024), and drafting and Cabinet submission (2025).

07 The programme will initiate empowering NGOs and PwDs in social protection, with needs assessments (2023), framework development (2024), and national discussions to finalize inclusion in NSSS 2026+ by 2025.

03 The capacity-building process for leadership in social protection began in 2023, with tool development and training (2024) and a comprehensive needs assessment (2025) to guide ministries.

N The shock-responsive social protection framework, initiated in 2019, includes urban models (2023) and will be finalized in 2024 for inclusion in NSSS 2026+ by 2025.

∩ The single registry MIS development began with studies and design (2022), a roadmap and ICT solution (2023), and will progress with detailed planning (2024) and implementation (2024–2025).

09 Ongoing diagnostics include NSSS progress briefs, climate resilience mapping, PwD reports, blue economy policy support, urban protection models, and non-state actor assessments (2022–2023).

N5 The web-based M&E dashboard, operational since 2023, integrates reform and program data, with efforts (2024–2025) on data interoperability, automation, capacity building, and expanded program coverage by 2025.
